

An industry-wide problem

Protecting buildings from unauthorised copying / cloning of 125kHz proximity keyfobs.

Proximity key fobs are to be MIFARE 13.56MHz technology, or equal / higher security to reduce the risk of unauthorised copying or cloning. Older technology proximity key fobs, for example 125kHz and 153kHz are no longer acceptable.

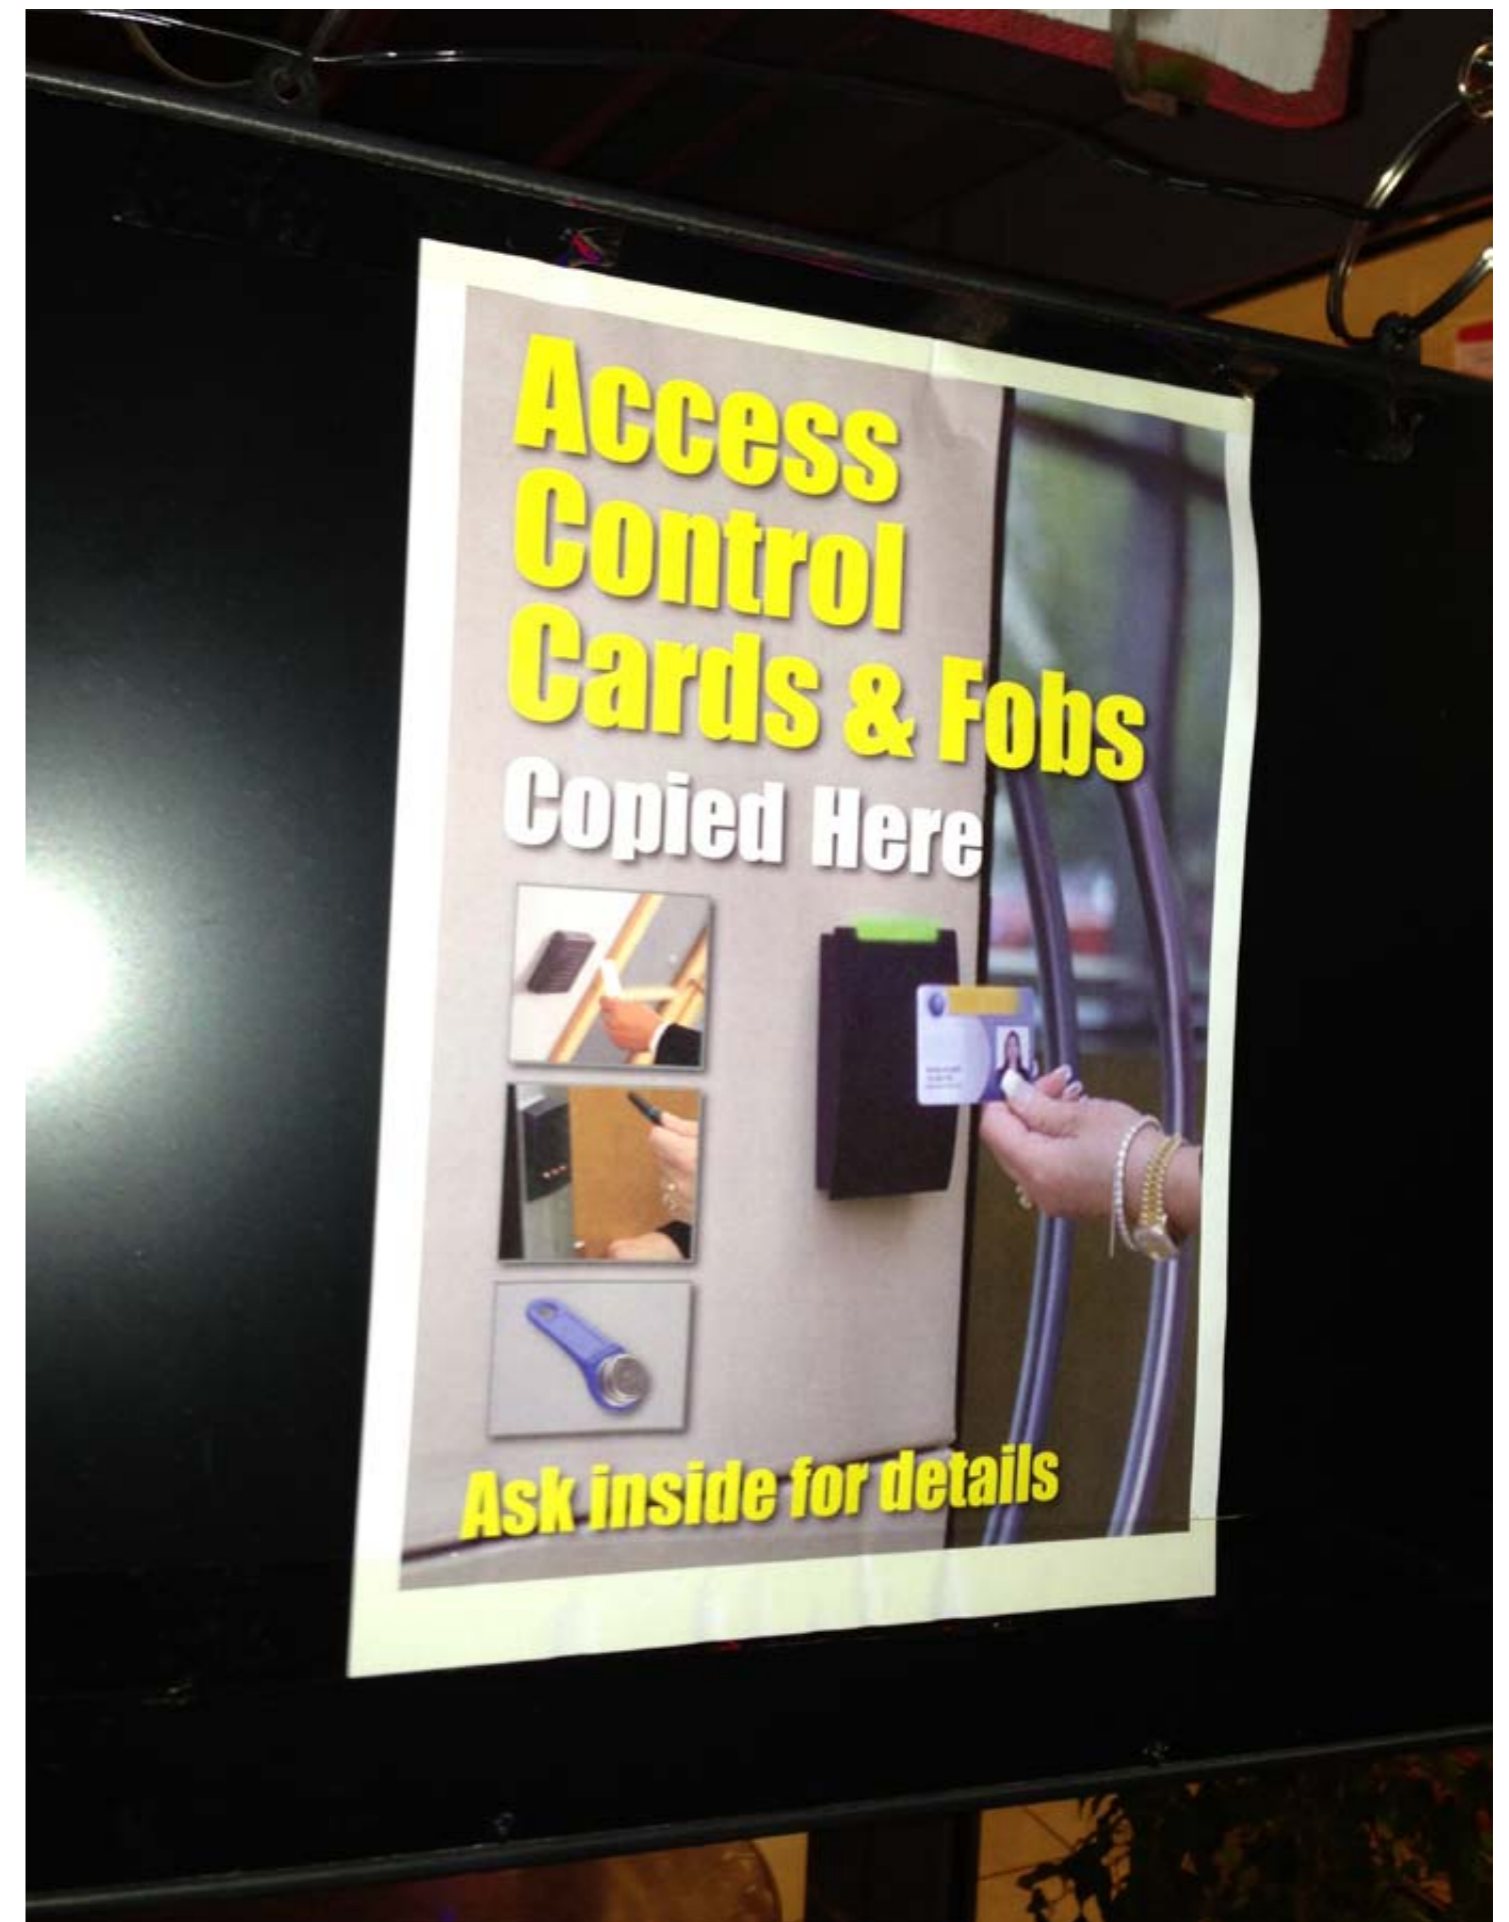

Proximity key fobs and radio transmitters must be robust and each to have a factory engraved visible unique ID number to facilitate control of the system by management and residents.

Radio transmitters for vehicle entrances must also incorporate the rolling code security feature.

BE CAREFUL AND MAKE SURE YOU ARE PROTECTED

Written confirmation is required from the security specialist of the technology type of both the proximity keyfobs and radio transmitters (credentials) proposed, their security encryption level and other measures taken to protect against unauthorised access using copied/cloned/forged credentials.

The security installer/m manufacturer must also, in addition to the above, confirm in writing that the security encryption of all the credentials provided meet all the requirements of Secured By Design and the National Security Inspectorate.

Remote Fob Copy

Do you need remote transmitter and fobs copied? Paxton, Pac, Stanley
Do you need a spare remote or to replace a remote that is becoming faulty or non responsive at times?
We can copy most of the makes out there in UK and Europe while you wait (some example : HORMANN, Neco, Pac, paxton, stanley, noralsy)
These can be rolling codes that change each time you use it or fixed codes.
All remotes are 90% guaranteed to work.

ALL TYPES OF FOBS & REMOTE COPYING

**Copies done for council, housing, offices,
car parks, gates,
barriers, alarms, lifts etc..**

Paxton, Pac, Stanley Fob Key Copied Now

All types of remote fobs, prox, ibutton, rfid fob now copied.

These can be for electric garage doors, car parks, barriers, alarms, door entry, underground parking, housing, electric rolling shutters and council block parking.

Some of the housing associations parking remotes we copy are:

Electronic Fobs And Cards Cambridge

Posted on February 21, 2013 by shaun

You can now get your electronic key fobs and smart cards copied at Halls of Cambridge. We can copy most types of RFID and magnetic fobs, as well as smart cards. Just pop into our shop and we can scan your fob or card. If we are able to copy it, this can be done while you wait or while you have other keys cut.

Many buildings in Cambridge use electronic fobs for parking barriers or communal entrances and it can sometimes be difficult to obtain spares. Thankfully this problem is solved with our new copying service.

If you have any queries contact Shaun in the shop on 01223 416000

RF Copy

Duplication of Condo Cards, Access Cards and many types of 'Proximity' Cards

How It Works

Contactless memory cards do not have batteries and have no processing power for data management. All memory cards communicate to readers through synchronous protocols using radio frequency (RF).

There are six main types of RF memory cards in common use today. Although they may look similar, they are known by the following names and characteristics. All of them are contactless - you only need to put them in proximity of the reader to be detected and the data can be read. We are able to duplicate the straight memory cards - not protected cards or stored value cards.

Click on the links below to view a card sample. Usually EM and T5 do not have distinctive markings other than serial numbers. EM is usually thicker than a credit card. Please note that your card may look different, but if you see markings like the Indala or iClass logos, these are cards we cannot duplicate.

About Us
RF Copy is a new business operated by Iterate Pte Ltd, a Singapore company specialised in digital media solutions and services.

Office Closure
Please note that our office will be closed from 11 - 15 February for Chinese New Year.

Type	Technology	Frequency	Duplicate?
EM	EM Micro-electronics chipset	125 KHz	Yes ← !
T5	Amtel T55x7 chipset	125 KHz	Yes ← !
HID	Hughes Identification Devices chipset	125 KHz	Yes ← !
HID iClass	Hughes Identification Devices chipset	13.56 Mhz	No *
MIF	Mifare or Hitag chipset	13.56 Mhz	Yes ← !
IN	Indala chipset	13.56 Mhz	No *

* These card types use encryption.

Our Service

We duplicate contactless proximity cards. We cannot duplicate every type of card, but we can copy about 80% of the cards on the market. Present your condo or club access card

CLONING REMOTE

All remotes come complete with full programming instruction

Universal Remote Control Keyfobs
Cloning Universal Garage and Gate Remote Control

The GR4000 is a 4 channel remote that can copy any 433MHz fixed code remote with DIP switches or fixed code remotes.

A great feature of the GR4000 is the sliding cover which prevents accidental operation and undue battery wear when kept in pockets, handbags etc.

These cloning remotes can only copy 433 MHz DIP switch remote controls. To check you remote open up the case to see if it has DIP switches as shown below.

Your remote should have between 8 and 12 switches inside that look similar to those shown above.

The GR4000 can assign up to 4 different channels to the 4 buttons. i.e. up to 4 garage door or gate receivers.

This remote is not compatible with rolling code or code hopping technologies.

Operating Distance: up to 80m

Batteries: 12 VOLT 27A (Included)

Quantity discounts:
5+ = 5% discount, 10+ = 10% discount
Discounts are added automatically on checkout

PRICE: £ 29.90 inc VAT

Quantity: 1 Add to Basket

IMPORTANT

RECEIVER CLONING REMOTE BATTERIES NOT SURE WHICH REMOTE? LINKS

Simple 4: Step Programming Instructions:

1. Clear memory and prepare for programming - Hold down buttons 1 and 2 until the blue LED flashes - this takes around 20 seconds.
2. Place the original and the clone remote close together.
3. Press the button to be programmed on both remotes and hold until LED flashes steadily on the clone remote.
4. Programming is complete - Repeat steps 2-4 to program extra buttons.

The GR4000 will copy all of the following and more:

ALLMATIC - AEMX1 433	BFT - TEO 1	CASIT - TXS1	DEA - DEA 433-1 (237)	DUCATI - TSAW1
ELBER - TSAW1	FAAC - TM 433-1	FICE - FLO 1	SEAV - TXS1	ALLMATIC - AEMX2 433
BENKA - LO.T2WMS	BENKA - LO.T2W	BFT - TEO 2	CAME - TOP432M	CAME - TOP432S
TAU - 250 TX2D	TELOMA - TANGO 2 SW	BFT - TEO 3	CASIT - TXS3	DUCATI - TSAW3
ELBER - TSAW2	FAAC - TM 433-2	SEAV - TXS3	ALLMATIC - AEMX1	BENKA - LO.T4W
